

# PROJECT REPORT

## CUSTOMER REGISTER

*Developed by*

Name : MD. RIZWAN FATMI

Address : Patna,Bihar-800 006

Mobile : + 91 8210006010

## ACKNOWLEDGEMENT

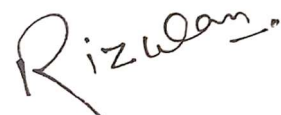

*My acknowledgment extends to all those who teach me to code and prepare projects. I am thankful to all of my teachers who give me valuable and very important guidance and information to make this Project Report Successful.*

*I am grateful to other members of my study center and regional center, Patna for imparting to me the required & necessary training, information, guidelines, sympathy, and criticism which upgraded my programming skills and troubleshooting while doing this project very much.*

*Lastly, I would like to thank my family, my friends, and my respected seniors for their moral support and other precious co-operations.*

*Place: Patna.*

*Date: 31/08/2022.*

A handwritten signature in black ink, appearing to read 'Rizwan', with a horizontal line extending from the end.

## 1 Project Title

***"CUSTOMER REGISTER"***

## 2 Problem Statement

A problem has been remarked over the time in every individual small and big business or organization who are collecting the information of their customers. Specially if they are using pen-paper for collecting the customer information, there is chance that it will be lost and it would also be very complex to retrieve the information of the customer, you have to search in every paper even if you are using excel or any other similar product you have to search the whole sheet if you want to retrieve any data from it. Here you can use customer master with few important features that will allow you to enter/update and delete the customer details easily and also you will be able to see the updated information table of customer same time.

## 3 Project Description

It is a Java-based application. It has been implemented for so many real-life difficulties to resolve and make ease of management of customer information. Here, an individual can enter/update and delete the customer details and can also see the customer register table at the same time.

### 3.1 Scope of the Work

This application-based project deals with the scope of help millions of organization who want to manage their customer information, specially for those who does not want to waste their time collecting and retrieving customer information.

## 3.2 Project Modules

### User Module: -

In this module user can enter/update and delete the information of customer and can also see the information of customer in form of table.

## 3.3 Context Diagram (High Level)

## 4 Implementation Methodology

This is a Java-based application with real-time database support. This project is based on a real-world problem of every individual organization who need to manage the information of customers. Anyone can opt this facility, We made this project dynamic so that any person who wants to adopt this project can adapt it easily.

Context Level/0 Level DFD of Customer Register:

## DATABASE TREE:

ATTRIBUTE	DATATYPE	CONSTRAINTS	PURPOSE
ID	VARCHAR	Not Null	For saving the Customer information
Name	VARCHAR	Not Null	For saving the Customer information
Address	VARCHAR	Not Null	For saving the Customer information
Line2	VARCHAR	Not Null	For saving the Customer information
City	VARCHAR	Not Null	For saving the Customer information
Pincode	VARCHAR	Not Null	For saving the Customer information
Mobile	VARCHAR	Not Null	For saving the Customer information
Gender	VARCHAR	Not Null	For saving the Customer information

## **5 Technologies to be used**

### **5.1 Software Platform**

- a) Front-end**  
Java Swing
- b) Back-end**  
Java
- c) Database:**  
Sqlite3

### **5.2 Hardware Platform**

- **RAM:** 2GB
- **Hard Disk:** 150GB
- **OS:** Windows 10
- **Editor:** Netbeans

### **5.3 Tools**

- **LANGUAGES:** JAVA
- **DATABASE:** Sqlite3
- **IDE:** NetBeans

## **6 Advantages of this Project**

- Help organization to manage customer information.
- Time saver application for organization.
- Easy to retrieve information of the customer.
- Easy to enter/update and delete customer information.

## **7 Any Assumptions**

None

## **8 Future Scope and further enhancement of the Project**

The future scope and the further enhancement of the project have been given below:-

- Login function for admin, so that other person cannot insert, delete, update or retrieve the confidential customer information of the organization.
- More user-friendly and easy to use.

## **9 Conclusion**

Time is essential for any organization. Implementing this type of system for any region will be highly useful in the current scenario. Nowadays any organization does not want to waste their time. This application will provide them with ease to manage customer information in terms of time, money, comfort, and help. This will be highly useful in this modern and digital era. It will help a lot to the uncountable organization today and in the future.
